Kawaii\u2665. uzis in ww2 cant see a foot in front of you have to sprint to even walk like a normal person got it for free from steam but god its like\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665\u2665on the kids a christmas . It's alright 9/10. I think this a great game dont let the spoilt bratz that think more expensive is better just because something is "unpolished" it hink it means its unspoilt from excessive forse from the big budget games these days <https://www.youtube.com/watch?v=xt-aTjfl8oI>. What an awful game for an exorcism.. I'll be honest with you, the game is a mess more often than not, has alot of cryptic stuff going on puzzle-wise (which is a bad thing since there are times where the explanation you are given is VERY brief, then it disappears. No journal or notebook whatsoever) and is riddled with glitches, some of them gamebreaking. But it has its shining moments, nameably Vinny's voice actor (who does a great job, salvaging the whole game) and the ending...well, let's just say it didn't disappoint.. WTF . just no, not even on 90% off. 4 months for this? Wow.

Not worth the money asked for it, regardless of which make of car it is.. The uninstall button doesnt even work for this game

They need to work on this game a lot, The interface is bad, graphics are ... weird. It does not have other AI run trains even though they are working on it. Walking through doors is one bug of many but they do seem to be updating it a lot so I would say I can't recommend the game in current state but give 6 months or a year or ...2 and this game could be something good as it has a lot of potential. Probably won't refund it as I wait for updates. Also the price is not bad at all. Verdict Wait awhile

Best Game Of Its Genre Of course

But there are approximately no players :(

. snake in VR! love it. Simple but entrancing, just be careful not to trip or tangle your chord as you play. Good Game!!!!

I'm play the Alpha 2 and 3 and now I play Alpha 8.

The game is Fantastic.

!!!Bad!!!

The game servers is blocked .

Game is dead.. An old school shooter which makes a hell lot of fun. The downsides are: bad graphics, repetitive and bad performance.. nice free to play hidden objects game. Gameplay quite repetitive though.. Only problem is their terrain mode only. I do however love this DLC, it adds some nice flavour.. There are a couple of puzzles in this game that super annoying, but I think the spooky atmosphere and memorable/interesting characters more than make up for it. The whole game takes place on a rainy night in New Orleans. You switch between Nancy, who is at a house next to a cemetery and the bayou, and Bess, who is at their hotel in the French Quarter. You don't have to constantly switch back and forth, just 4 times I think, and Bess is pretty adorable so I liked getting to play as her.
